

Alternative Cellulose: call for papers

The 7th International Symposium Alternative Cellulose: manufacturing, forming, Properties will take place September 6-7, 2006 in Rudolstadt/Germany. Organized by Thuringian Institute of Textile and Plastics Research (TITK), Rudolstadt, the objective of this symposium is to provide a communication platform to scientists acting internationally in the cellulosic field in order to present the latest R&D results of economy and science and to generate new approaches in the subject.

Main topics

- Current developments in the pulp production
- Alternative shaping processes for cellulose and cellulose derivatives
 - new solvent concepts
 - new technologies
 - new product characteristics
- Current trends in cellulose
- Applications of novel shape bodies of cellulose and cellulose derivatives.

TITK invites to file a proposal for a paper to the mentioned subject complexes by **November 30, 2005**. The conference language is English.
